GAURI SATISH TAWADE

SQL Developer (Fresher) | MySQL | Database Design

Dhule, Maharashtra, India | +91-9226048421 | tawadegauri403@gmail.com | linkedin.com/in/gauri-tawade | github.com/gauri-creator

Career Objective

MCA candidate (2026) seeking an entry-level SQL Developer role where I can apply my skills in MySQL, schema design, and normalization to build reliable, well-structured databases. Hands-on experience from a 6-month internship and two database-driven projects.

Education

Master of Computer Applications (MCA) | School of Computer Science, KBC North Maharashtra University, Jalgaon | Expected 2026

Bachelor of Computer Applications (BCA) | Systel IMR, Dhule, KBC North Maharashtra University, Jalgaon | 2021 – 2024

Technical Skills

SQL and Databases: SQL, MySQL, Relational Schema Design, Normalization, Referential Integrity, Data Modeling

Programming: Python, JavaScript, HTML5, CSS3, Object-Oriented Programming (OOP)

Web and Data: AngularJS, Bootstrap, jQuery, REST APIs, JSON, Pandas, NumPy, Scikit-learn

Tools: Git, GitHub, Unit Testing

Internship Experience

Software Developer Intern | Abuzz WebTech Pvt. Ltd. | Jan 2025 – Jun 2025

- Designed and managed a normalized MySQL schema with 10+ tables for a job portal, validated against 500+ seeded records.

- Supported candidate registration, resume uploads, and job applications through well-structured relational tables.
- Built job-posting, applicant-tracking, and shortlisting dashboards connected to the MySQL database.
- Implemented job search and filtering using REST APIs, AngularJS, Bootstrap, and jQuery.
- Used Git for version control, wrote unit tests, and debugged issues before releases.

Projects

Bus Management System | MySQL, SQL, HTML5, CSS3, JavaScript

- Normalized the MySQL schema across users, buses, routes, and schedules, removing duplicate bookings and enforcing referential integrity.
- Built booking and reservation features for 5 bus routes and an admin dashboard to manage buses, routes, and bookings.

Music Recommender System | Python, Pandas, NumPy, Scikit-learn

- Built a content-based recommender using cosine similarity on a 1,000-song dataset.
- Created genre, artist, tempo, and mood features from raw metadata and validated results with relevance checks.

Strengths

Problem Solving | Analytical Thinking | Attention to Detail | Quick Learner
